CALL FOR PAPERS

The program committee of ICSESP-2018 invites technical submission which must be full-paper article that illustrate original, authentic and unpublished engineering attributes that describe advancement and significant innovations in engineering and technology towards "Smart Solutions for Smart Cities" Submissions and Articles covering perspective theoretical concepts and practical developments are invited from the following three major tracks but are not limited to the topics there-in.

TRACK 1 **SMART ENERGY & POWER**

SMART SECURITY AND SAFETY TRACK 2

TRACK 3 **SMART IT & COMMUNICATIONS**

PAPER SUBMISSION

All the submission should be in accordance to IEEE Double **Column Format**. All submissions can be submitted through the Easy chair Conference papers submission system. Those who do not have an Easy chair account will need to create one.

ICSESP 2018 "Smart Solutions for Smart Cities"

ICSESP-2018

Smart cities are recognized as the developing platform to drive progressive change. They are considered to be the propellers of economic growth and conventional development. The objective of the smart cities is to use digital communication and system network to have optimization in the use of resources like energy, water, transportation and infrastructure and improve governance, health care and waste management. Smart Cities require continuous power supply, which essentially requires having strong and smart transmission and distribution systems.

The objective of ICSESP-2018 is to analyse and therefore provide a better standard of living via improved and automated mechanisms by embedding latest technologies which entail incessant supply of power. It provides a platform to bring together all the academicians and researchers to understand and review the challenges that creates disturbance in the poor power distribution network. As our Temple City, Bhubaneswar is declared as the Smartest City in the country, this conference would chalk out plans and nurture ideas to make our city a leading example for others. The objective of the conference is

- ❖ To determine the challenges in developing smart energy infrastructure
- To find solutions to eradicate power flow and power quality issues
- ❖ To avoid blackouts through microgrids and distributed generation
- ❖ To analyze development of infrastructure focusing on electrification of transportation.
- To develop and discuss safety and security solutions for power terrorism.

CVRCE, BHUBANESWAR

Making a modest beginning in the year 1997, the C V Raman Group Institutions (CVRGI), has come a long way in its memorable journey. C V Raman College of Engineering (CVRCE) is now ranked within the top 100 Colleges of the Country as per the National Institute Ranking Framework (NIRF) of Ministry of Human Resource and Development (MHRD) consecutively for the last two years. Being the first private Autonomous Engineering College in the state of Odisha as declared by UGC, CVRCE strives to promote the highest standards of technical education. It has been accredited as Grade "A" engineering college by NAAC & NBA. We at CVRCE maintain the focus of professional excellence while imbibing highest level of social moral and ethical values amongst students to transform them as fine human beings and able citizens.
